

# BONSAI

## CARE INSTRUCTIONS

**Light Requirements:** Give your Bonsai 5 to 6 hours of bright and direct sunlight daily, place in a south facing window if possible

**Temperature and Humidity:** Bonsai like high humidity and warm temperature. Increase humidity near your Bonsai tree by placing it on a humidity tray filled with water and by misting your tree a few times a week. Bonsai can be placed outdoors during warm summer months

**Watering:** Water when the soil gets slightly dry, saturate the roots until water drains through bottom of pot. Never let the soil get completely dry! Hollandia waters their Bonsai with one shot glass of water every day and has great success!

**Fertilization:** You can fertilize year-round once a month. The best time to fertilize is May to September, which is their growth season.

**Trimming:** You can trim some new growth to keep a desired shape to your tree but be sure **not** to trim off **ALL** new growth to sustain the health of your tree

**All Pot Covers Priced Separately**
