

CACTUS

CARE INSTRUCTIONS

Light Requirements: Around 4 hours of direct sunlight per day with low humidity and warm indoor temperatures recommended

Watering: Allow the soil to dry almost completely between watering, this can be anywhere from once a week to once every 2-3 weeks depending on the cacti type and its size. Cut back to watering once a month during the winter as the cacti is semi dormant

Fertilization: Be sure the cacti is in well draining soil. Your cacti can be fertilized once a month from May to October, dilute the fertilizer to $\frac{1}{4}$ of its usual strength.
